**Abstract.** Records of *Lacon nadaii* Platia & Németh, 2011 and *Lacon unicolor* (Candéze, 1874) are listed. Published records of *L. unicolor* from Turkey were revised and the specimens proved to belong to *L. nadaii*. Additional specimens of *L. nadaii* were found in Turkey, Iran and Iraq. Habitus and habitat photographs of both species and distributional map are also given.

**Key words:** Coleoptera, Elateridae, *Lacon nadaii*, *L. unicolor*, distribution, Asia, Iran, Iraq, Turkey

### **Collections**

The material studied is deposited in the Hungarian Natural History Museum, Budapest (HNHM), (Hungary), National Museum, Praha (NMP) (Czech Republic), private collections of Václav Dušánek, Zábřeh (Czech Republic), Dirk Frenzel, Sonneberg (Germany), Sándor Ilinczky, Budapest (Hungary), Vítězslav Kubáň, Šlapanice (Czech Republic), Josef Mertlik, Opatovice nad Labem (Czech Republic), László Nádai, Budapest (Hungary), Giuseppe Platia, Gatteo (Italy) and Béla Szelencrey, Győr (Hungary).

### **Distribution of *Lacon nadaii* Platia & Németh, 2011**

**Described from Iran:** prov. Kordestan, Askaran (35°05.095'N, 46°54.239'E), 25 km S from Sanandag, Kuhhâ-ye-Zagros, Kuh-e-Shâhn, 1350 m, 8.vi.2007, 1 ♂ (holotype), at light, L. Nádai leg., HNHM coll.; dtto, 1 ♂ (paratype), G. Platia coll.

**Published data:**

Turkey, prov. Mardin, Haberli, 33 km SE Midyat (37°17'N, 41°35'E), 17.v.2001, 1 ♂, S. Kadlec leg., J. Mertlik det. et coll. (Mertlik & Platia 2008 as *Lacon unicolor*), J. Mertlik revid. 2014.

**New data:**

Iran, prov. Kordestan, Mts. Zagros, Askaran (35°05.0881'N, 46°54.237'E), 1365 m, 8.v.2008, 1 ex., singling and sweep netting, T. Hácz, K. Székely & K. Vig leg., J. Mertlik det. 2010 as *Lacon unicolor*, T. Németh revid. 2014, HNHM coll.

Turkey, prov. Siirt, Baykan dint., 18.v.2012, 1 ♂, A. Kozlov leg., G. Platia det. et coll.

Iraq, prov. Kurdistan, Khurmal, 700 m, 15.vi.1976, 2 ♂♂, J. Macek leg., V. Kubáň et J. Mertlik coll., J. Mertlik det. 2014.

Iraq, prov. Kurdistan, Penjwin, 1300 m, 11.v.1976, 1 ♂, J. Macek leg., V. Kubáň coll., J. Mertlik det. 2014.

**New species for Iraq and Turkey.**

## Distribution of *Lacon unicolor* (Candèze, 1874)

**Described from Iran [Perse. (Coll. Jans.)].**

**Published data:**

- Iran: Pusht-i Kuh, 2000 m [ Poucht-é-Kouh: Halazard] (Buysson 1906).  
 Iran, Pusht-i Kuh, Shirvan, 900 m [Poucht-é-Kouh: Chirvan] (Buysson 1906).

## DISCUSSION

*Lacon nadaii* is compared by original description to *Lacon unicolor* for the general shape and size. *Lacon nadaii* can be easily separated from *L. unicolor* by black piceous colour, shagreened dorsal surface giving this species a dull appearance, and shorter third antennomere.

We had at our disposal 8 specimens of *L. nadaii* and 40 specimens of *L. unicolor*. The characters used in the differential diagnoses are mostly stable, only one specimen of *L. nadaii* from Haberli (Turkey) has the third antennomere similar to that of *L. unicolor*, and one specimen from Khurmali (Iraq) has the coloration of basal part of elytra and hind pronotal angles the same as *L. unicolor*. Except these two cases, both species can be easily separated by the original descriptions.

The above mentioned list of records for *L. nadaii* and *L. unicolor* enable us to delimit the borders of distributional areas of these species (Fig. 5). Both species are distributed in Armenian-Iranian province in Iraq-Turanian area of Holarctis. *Lacon nadaii* occurs in the northwestern part of that province, whilst *L. unicolor* is distributed in the central part.

The bionomics of both species is unknown. Several specimens were collected by beating oak branches, however, the majority of specimens were collected at light.

## ACKNOWLEDGEMENTS

We would like to thank Karel Schön (Litvínov, Czech Republic), who provided us with the elaterid material from the collection of late Stanislav Kadlec (Litvínov, Czech Republic), Vítězslav Kubáň (Šlapnice u Brna, Czech Republic) and Jiří Hájek (Praha, Czech Republic) who provided us with the material from the collection of the National Museum in Prague, and Giuseppe Platia (Gattico, Italy) for providing us with the data from his collection.

We thank Jiří Hájek and Martin Rejzek for providing us with the photographs of the habitats.
